ROUX ASSOCIATES, INC.
Environmental Consulting & Management

Senior Engineer

Our office in Logan Township, New Jersey is seeking responsible, self-sufficient, energetic Senior Engineers with environmental consulting experience to support the office on-site remediation, engineering design, and environmental compliance related projects. Project management, staff development, and business development will be key responsibilities in the role, which provides an opportunity for growth into a Principal level position. The ideal candidate will be motivated to develop and build on these skills to assist with the growth and success of the office. We offer a friendly, professional atmosphere with excellent benefits and a salary commensurate with experience.

Primary Responsibilities

- Develop and implement business strategies that will positively impact the growth of the office and the firm's environmental services
- Support the office project work and collaborate with the Office Manager and staff to service clients and complete projects on time and on budget

Tasks Performed

- Environmental sampling of soil, soil vapor, and groundwater
- Health and safety monitoring
- Design and construction inspection of remediation processes and systems
- Evaluation and optimization of existing remediation systems
- Oversight of remediation and construction subcontractors
- Review of field data and preparation of data evaluation reports
- Cost estimating, report preparation, and task management
- Perform and check engineering calculations
- Prepare engineering drawings, specifications, and scopes of work for construction
- Participate in client presentations and relationship development

Essential Functions

- Initiate and/or assist with site investigation, analysis, and report preparation activities
- Manage and service clients from proposal preparation to sales presentations through project execution
- Assist with client development and maintenance

Desired Education

- Bachelor's required; Master's preferred
- Environmental, Civil, or Chemical Engineering

Desired Job Experience

- 8+ years of environmental consulting experience including field work and project management
- Familiarity with remediation equipment, processes, and maintenance
- Ability to produce quality work on budget and on schedule
- Strong written and verbal communication with technical writing experience
- Knowledge of Microsoft Word, Excel, Power Point, and Access
- Experience with databases and GIS preferred

Certifications

- Valid driver's license (no DUI/DWIs)
- PE preferred
- OSHA HAZWOPER 40-hour training
