

Mid-Level Project Manager (Engineer, Geologist, or Scientist)

Roux Associates is seeking responsible, self-sufficient, energetic Project Manager (Engineer, Geologist, or Scientist) for an exciting opportunity in our growing Los Angeles office in Long Beach, California. You will work with Fortune 500 and public sector clients to help them solve their most challenging environmental issues. The position presents an opportunity to advance quickly in both technical and project management roles. A successful candidate will be someone with significant field experience and excellent project management skills. The position is intended for an individual with strong technical skills, who can also effectively communicate with clients, regulators, and subcontractors.

Primary Responsibilities

- Perform field work, office tasks, and project management support for traditional assessment and remediation projects
- Collaborate with Senior Project Managers and Principals to service clients and complete projects on time and on budget

Tasks Performed

- Field and office management of soil, soil vapor, and groundwater sampling; health and safety monitoring and remediation implementation
- Development and management of project scopes, schedules, and budgets
- Preparation and review of regulatory and technical reports
- Client and regulatory agency communications
- Delegation of project work and training of junior staff

Desired Education

- Bachelor's required; Master's preferred
- Background in Engineering (Environmental, Civil, or Chemical), Geology, or Earth Science

Desired Experience and Skills

- 3-8 years of relevant experience in the environmental field with demonstrated progression in technical site investigation/remediation and task management
- Experience with field characterization and remediation systems
- Knowledge of remediation equipment, processes, and maintenance
- Ability to lead contractors, coworkers, and other professionals in a task management capacity to complete project scopes within budget in a timely manner

- Strong written and verbal communication with technical writing experience
- Knowledge of Microsoft Word, Excel, PowerPoint and Access
- Experience with databases and GIS preferred

Certifications

- Valid driver's license (no DUI/DWIs)
- PE or PG preferred
