

PROFESSIONAL PROFILE

Kristen Knorn

Managing Consultant

EXPERIENCE SUMMARY

Kristen Knorn is a Managing Consultant in Roux's Economic and Complex Analytics practice, specializing in data analytics, quantitative modeling, database management, and financial analysis for dispute resolution, strategic litigation management, and risk quantification. Ms. Knorn provides consulting expertise estimating litigation risk and economic damages related to environmental and product liability. She has developed forecasting models, allocation models, and database management solutions for litigation, settlement negotiations, and managing ongoing litigation. In addition, Kristen is leading the ECA sub-practice group, Roux Data Solutions, and is involved in the ESG and Climate Risk Analytics group. Ms. Knorn also has extensive experience building and advising tech start-ups, managing software development, and managing large-scale data analytics projects. Ms. Knorn holds a Master of Public Policy specializing in Economic Policy & Sustainability from the Hertie School of Governance and a BA from the American University.
