

PROFESSIONAL PROFILE

Christopher Konen Jr, PE

Senior Engineer I

EXPERIENCE SUMMARY

Mr. Konen has over fourteen years of experience, including Senior Engineer I at Roux (2025–Present), Project Engineer at Ramboll (2019–2025), and Project Engineer at O’Brien & Gere (2011–2018).

TECHNICAL SPECIALTIES

Mr. Konen has been involved with several ongoing environmental compliance programs for major industrial firms in a variety of industries. His environmental compliance experience includes regulatory applicability evaluations, auditing, and compliance reviews; air emission evaluation and permitting; RCRA waste characterization, profiling, and disposal; spill prevention and response planning; and EPCRA reporting. He has acted as a liaison between clients and regulatory agencies, and has assisted clients with developing custom management systems for compliance management and with minimizing regulatory requirements through compliance management. Mr. Konen also practices in the areas of sustainability and corporate social responsibility (CSR). His experience includes preparing energy, sustainability and climate action plans, sustainability reports, and investor disclosures; and informing and engaging employees on these matters.

REPRESENTATIVE PROJECTS

- **Environmental Compliance Assistance for Several Manufacturing Clients.** Services included:
 - Management of air permitting programs, including evaluation of applicable air permitting requirements (major source and minor source), air emission calculations, permit application preparation, identification and streamlining of permit requirements, development of compliance plans, and preparation of annual emission statements.
 - EPCRA annual reporting (Community Right-to-Know, Toxic Release Inventory).
 - Preparation of facility spill prevention and response planning, including SPCC, NJDEP DPCC, and PADEP PPC/SPR.
 - Pollution prevention planning, including plan development and annual reporting.
 - Federal (RCRA) and state hazardous waste reporting.
 - Preparation of Stormwater Pollution Prevention Plans and identification of Best Management Practices.
- **Sustainability Consultant for Global Corporate Sustainability Plans, Working Closely with Global Leadership Teams.** Work products have included:
 - Developed Key Performance Indicators (KPI) and Environment, Health, and Safety (EHS) scorecard metrics, including energy usage, greenhouse gas (GHG) emissions, water, and waste as part of overall corporate sustainability programs.
 - Assisted with the development of long-range, multi-year program goals including assessment of peer/competitor, sector leading companies.
 - Assisted in the compilation of environmental metric data and reviewed for completeness and accuracy. Provided guidance and input for GRI environmental indicator reporting for preparation of an annual corporate sustainability report. Provided oversight for the preparation of responses to investor surveys including CDP climate change and water questionnaires and the Dow Jones Sustainability Index (DJSI) assessment.
